

ISMosys

Engineering Solutions for the Global Electronics Industry

From the Seed to the Harvest

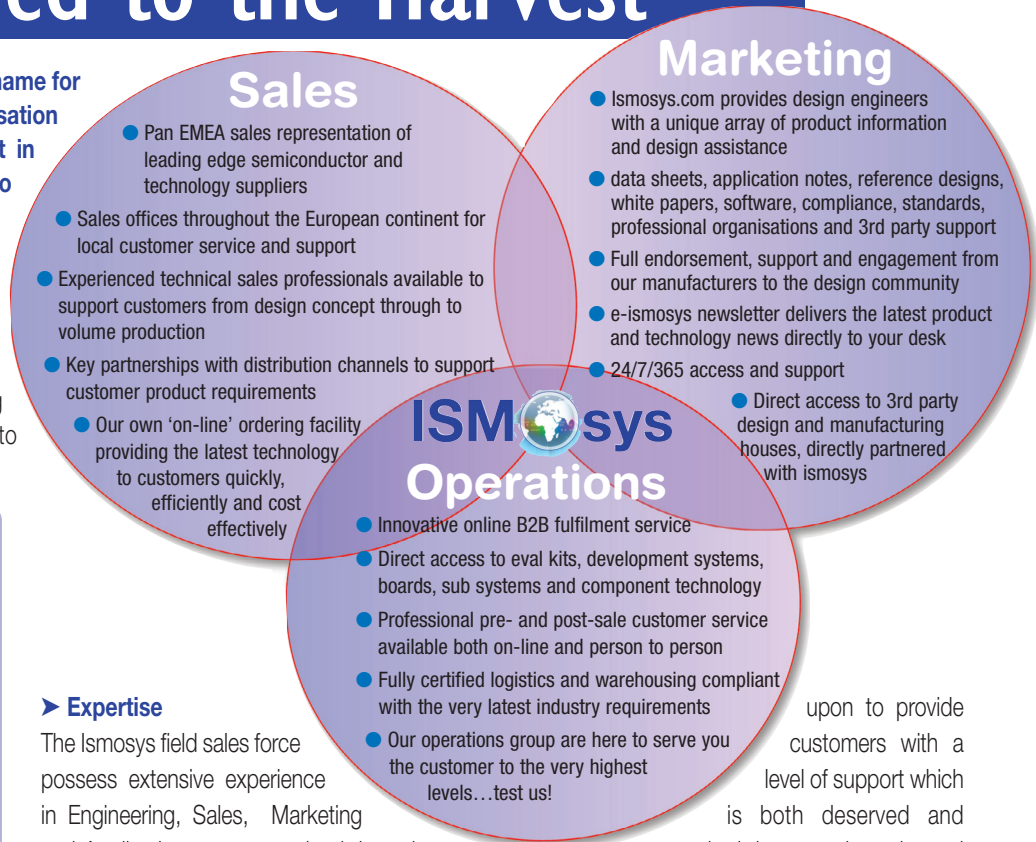

Ismosys is the new pan-European trading name for the Spectrum Electronics Group, an organisation founded in 1994 to provide the very best in sales, marketing and operations support to customers and associated design, manufacturing and software partners.

Operating from local offices located throughout Europe, Ismosys meets the demands and challenges of today's technological marketplace by providing customers with unparalleled access to technology, information and service.

www.ismosys.com

Ismosys.com is an industry wide web portal specifically developed for and used by the wider electronics engineering community including customers, the manufacturers represented by Ismosys and many other partners. Conceived to provide easily accessible, practical solutions and resources to assist engineers to meet the challenges of modern product design and development, Ismosys.com provides instant access to the latest information on leading edge technology companies, and to their most innovative products and services, in a way never before experienced in the electronics industry.

And by reducing the need to search far and wide for innovative new products and providing tailored access to companies specialising in development and manufacturing services, Ismosys.com is enabling participating leading edge technology businesses to achieve the all important competitive edge.

► Expertise

The Ismosys field sales force possess extensive experience in Engineering, Sales, Marketing and Applications support gained through long service in the electronics industry. Our teams throughout Europe can be relied upon to provide customers with a level of support which is both deserved and required in very dynamic and demanding markets such as ours in Europe. We look forward to working with you.

Ismosys Nordic

Ismosys Nordic operates a full Sales, Marketing and Operations group from its facilities in Kista, Sweden.

The focus of the Ismosys Nordic team is to provide customers in every sector of technology with full 'design in' support and pre/post sale customer service of the highest level to help accelerate the development of tomorrow's products. Complemented by the innovative ismosys.com portal (see panel left) and our high technology supplier base (see overleaf), Ismosys Nordic is your ideal partner – from design concept through to volume manufacturing.

From the download of a data sheet to the procurement of a state of the art development system, Ismosys delivers... Call or contact us today.

Delivered by the Spectrum Electronics Group

— products stocked by our Distribution Partners

Casio Displays

Casio has dedicated itself to the development of consumer products that combine the latest technologies with innovative design. The LCD displays that distinguish Casio products are now available to the OEM market.

eSilicon

eSilicon offers its eSilicon Enterprise™, a comprehensive suite of services that enable a flexible, low-cost, lower-risk ASIC path to volume chip production.

Interphase Corporation

Interphase designs and manufactures robust building blocks, highly integrated subsystems and innovative gateway appliances for the converged communications network.

Pericom Semiconductor Corporation

Pericom enables serial connectivity with complete solutions for computing, communications and consumer market segments. Pericom's integrated circuits and SaRonix-eCera frequency control products provide the connectivity, timing and conditioning of high-speed signals required by today's electronic applications.

SanDisk

The world's largest supplier of innovative flash memory data storage products, SanDisk is the only company with the right to both manufacture and market every major flash memory card format.

Smart Modular Technologies

Smart offers more than 5,000 standard and custom memory products to top-tier computing OEMs. The range includes DRAM, SRAM and Flash technologies available in a wide variety of form factors.

— products stocked by us at Ismosys.com — www.ismosys.com

Airgain

Airgain is a wireless system innovator of patented smart antenna technology, embedded antenna designs, and modular wireless video and system products.

AVIX-RT

Specifically developed to support the 16-bit and 32-bit microcontrollers in the Microchip PIC24F, PIC24H, dsPIC30F®, dsPIC33F® and PIC32® families AVIX-RTOS really helps to solve the problems facing embedded systems developers.

Cavium Networks

Cavium Networks provides highly integrated semiconductor products that enable intelligent processing in networking, communications, storage and security applications, securely processing voice, video and data traffic.

GainSpan

Spun off from Intel in 2006, GainSpan has developed Wi-Fi semiconductor and software solutions that enable sensors and other devices to run for up to 10 years on a single AA battery.

IntellaSys Corporation

IntellaSys is focused on developing distributed digital media semiconductor solutions for compact embedded applications that demand low power operation.

InvenSense

InvenSense is the world leader in motion sensing solutions for mobile devices: The world's first integrated dual-axis gyroscope targets applications which include: image stabilization in digital cameras and camera phones.

LS Research

LS Research is the premier wireless product development company specializing in RF design, software development, and FCC/CE certification services. It is at the forefront of the latest wireless technologies including Wibree, Zigbee, Wireless USB, WiFi, Bluetooth and UWB.

RadiSys Corporation

RadiSys is a leading provider of advanced embedded boards, application enabling platforms and turn-key systems used in today's complex computing, processing and network intensive applications.

Ismosys Consultant Partners

► Manufacturing Partners — for details visit www.ismosys.com

Advent, Eolane, eSilicon

► Design Partners — for details visit www.ismosys.com

Andimedics, Cynove, Disign Consultants, Dynamiq Engineering, Eolane, eSilicon, HCELL Engineering, Inverto, LS Research, MicroProcessor Engineering, Ropet RF, Sky Logic, Xentech

► Software Partners — for details visit www.ismosys.com
